

SHATTER THE STIGMA

An Interprofessional Simulation with Standardized Patients

Time

June 12, 2026 | 8:30 AM - 12:30 PM (Virtual)

Overview

Because healthcare professionals are typically the first points of contact for a person with a substance use disorder (SUD), we should all take the necessary steps to reduce the potential for stigma and negative bias. Take the first step in shattering the stigma of SUDs by learning and practicing the use of destigmatizing patient interviewing techniques with standardized patients.

Key Message

Reducing stigma improves trust, engagement, and access to care for people with substance use disorders.

Featuring

- Keynote presentation on SUDs and harm reduction strategies
- Keynote presentation on destigmatizing the patient interview in SUDs
- Small group interprofessional simulation with standardized patients
- Large group debrief
