The reality of the COVID-19 pandemic has necessitated a major and rapid shift in teaching strategies across health professions education, including IPE. Join us for this two-hour workshop-style virtual event to learn more about innovations in IPE programming in online learning environments.

Featuring: ANDRÉ THOMAS

André Thomas' passion for game-based learning resonates inside and outside of the classroom. A graduate of LCAD MFA in Game Design, he founded and serves as the director of the LIVE Lab in the Department of Visualization at Texas A&M University.

Keynote Presentation: Disaster Strikes – How a Game Saves the Day!

Select a Workshop:

- **W1:** Game-Based Learning for Interprofessional Education. Thomas & Kaunas, Texas A&M University
